amerhamdan.com · github.com/amerhamdan3 · linkedin.com/in/amerhamdan3

Open to senior full-stack, tech lead, and AI-product roles — remote or Istanbul.

SUMMARY

Senior full-stack engineer and team lead with ten years building production web platforms across intelligence, news, recruitment, and commerce. Currently lead engineer on a multi-product platform written in Go and TypeScript — GraphQL, REST, and WebSocket APIs over PostgreSQL, an OpenAI-compatible LLM gateway with retrieval-augmented generation and per-token billing, and bilingual Arabic/English dashboards, all deployed to GKE and Cloud Run. Designs and ships AI agent systems, and works agent-first day to day with Claude Code, Cursor, Codex, and Gemini CLI. Earlier work was mostly legacy migration: PHP to Laravel, WordPress to Next.js, with measurable gains in performance and engagement each time.

EXPERIENCE

Senior Full-Stack Developer / Team Lead

ID8 Media · Istanbul, Türkiye · 2023 — Present

- Lead engineer on a large intelligence platform: Go services behind GraphQL, REST, and WebSocket APIs over PostgreSQL, with a bilingual Arabic/English Next.js dashboard.
- Built an OpenAI-compatible LLM gateway routing five model providers behind a single token, with per-token usage metering, billing, and retrieval-augmented generation on pgvector.
- Raised project success rate 25% by leading development teams through 5 complex, concurrent client builds.
- Improved software efficiency 15% for news agencies by engineering tailored publishing and content-delivery solutions.
- Built large-scale global hiring platforms handling multi-region job data and employer workflows.
- Own the delivery pipeline across clients: architecture, code review, Terraform-managed GKE and Cloud Run deploys, and post-launch performance.

Web Lead & Site Administrator

Multifaith Alliance · New York, United States (remote) · 2021 — Present

- Improved site performance 70% by rebuilding the entire site with Next.js and Tailwind CSS.
- Migrated a legacy WordPress installation to a fully custom modern stack with no loss of content or search ranking.
- Built dynamic page types and a reusable component system the non-profit's staff can extend without a developer.
- Reworked SEO structure, page-load speed, responsive behaviour, and production deployment.

Founder & CEO

Amenu (SaaS) · Global · 2020 — Present

- Grew to 1,000+ active users, demonstrating real market adoption without a sales team.
- Shipped three major versions, each iterating on features, onboarding, and performance from live usage data.
- Built and run the full stack independently — product, front end, back end, billing, infrastructure, and support.

Head of Developers Team

Orient News · Dubai, United Arab Emirates · 2021 — 2023

- Increased user engagement 30% by leading the development of a new website for a major news agency.
- Boosted platform performance 30% by migrating the newsroom from native PHP to Laravel.
- Built and led the development team from scratch, setting review standards and release process.
- Owned the SEO strategy and content architecture, growing organic traffic and improving Core Web Vitals.

Head of Developers

Alpha Creative Agency · Istanbul, Türkiye · 2016 — 2021

- Delivered 21+ production websites across client industries.
- Led the programming team day to day, from scoping through delivery and handover.
- Designed and implemented admin panels and front-end interfaces for clients with no in-house technical staff.

EARLIER EXPERIENCE

SEO & Technical Consultant, Freelance · Global · 2020 — Present

- Delivered comprehensive site status analyses for 100 clients, translating audits into ranked action lists.

Senior Consultant, Inhouse Global · Istanbul, Türkiye · 2020 — 2021

- Increased user engagement 30% by developing a fully functional website from scratch.

Full-Stack Web Developer, Job2Go Recruitment Agency · Wales, United Kingdom · 2019 — 2020

- Reduced downtime 30% by defining the site roadmap and establishing robust server infrastructure.

Full-Stack Web Developer, Questionnaire Connect · United States (remote) · 2018 — 2019

- Increased survey response rate 35% by developing a purpose-built web application for Questionnaire Connect®.

SELECTED PROJECTS

Maestro · Independent · 2026 — Present · Autonomous agent pipeline, Arabic-first

An autonomous AI social-media agency for the Arabic market. Agents research, plan, write, and schedule a brand's output end to end, with a human approving rather than authoring. Stack: TypeScript, AI agents, LLM orchestration, PostgreSQL, Next.js, RTL.

Medhat Pasha · Independent · 2026 — Present · Multi-tenant commerce SaaS, built solo

Multi-tenant e-commerce platform for the Syrian market — a single engine powering unlimited Arabic storefronts, built for merchants with no technical staff and tuned for slow connections. Stack: TypeScript, Next.js, Express, Multi-tenant, Monorepo, RTL.

Social listening dashboards · ID8 Media · 2025 — 2026 · Hourly ingestion across three platforms

Media-monitoring dashboards that ingest X, Instagram, and Facebook and surface sentiment, trending topics, and emerging hashtags for communications teams. Stack: Next.js, TypeScript, Firebase, Sentiment analysis, Cloud Scheduler.

Social API engine simulator · ID8 Media · 2025 · Unblocked front-end work with no live feed

A generator that produces realistic social posts, usernames, metrics, and timestamps from Gemini, so dashboards and pipelines could be built and demoed before any live data existed. Stack: Next.js, TypeScript, Gemini, Firebase, shadcn/ui.

SKILLS

Languages: TypeScript, JavaScript, Go, PHP, Python, SQL, Java

AI engineering: LLM gateway architecture, OpenAI-compatible APIs, Multi-provider routing (OpenAI, Anthropic, Gemini, Grok, Ollama), Agent design & orchestration, Multi-agent workflows, Model Context Protocol (MCP), RAG (pgvector, pg_search), Embeddings & vector search, Structured outputs & tool calling, Streaming responses (SSE), Prompt engineering & evaluation, Token metering & cost control, Sentiment & entity extraction, Machine translation

AI-assisted delivery: Claude Code, Cursor, OpenAI Codex, Gemini CLI, MCP servers, Agent-assisted refactoring & review, Spec-driven development, Repo conventions for coding agents

Backend: Node.js, Express.js, Go (Cobra), Laravel (PHP), Strapi, REST API design, GraphQL, WebSockets, NATS, Authentication, Role & permission systems, Caching

Frontend: React, Next.js (App Router), TypeScript, Tailwind CSS, shadcn/ui, Material UI, Responsive design, Bilingual EN/AR & RTL, Accessible layouts, UI/UX

Data: PostgreSQL, MySQL, MongoDB, Firestore, Prisma ORM, pgvector, Schema design, Migrations

Cloud & DevOps: Google Cloud Run, Cloud Build, Cloud Scheduler, GKE / Kubernetes, Terraform, Docker, Nginx, PM2, Linux server management, CI/CD pipelines, Git & GitHub

Practice: Technical & on-page SEO, Core Web Vitals, Team leadership, Monorepos, Multi-tenant architecture, Agile / Scrum, Jira, Trello, Slack

Spoken languages: Arabic (Native), English (Professional working proficiency), Turkish (Advanced)
